## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see page 13, paragraph 2, filed January 7, 2005, with respect to claims 1-19 have been fully considered and are persuasive. The rejection of claims 1-19 has been withdrawn. Upon further analysis of Leedy, Minamiyama, and Burgess, the examiner has determined that to produce the claimed invention the combination would have required the modification of an already modified reference, thereby making the combination beyond that of one having ordinary skill in the art at the time the invention was made.

### ***Allowable Subject Matter***

2. Claims 1-19 are allowed.
3. The following is an examiner's statement of reasons for allowance: A fertilizer distributor in a multiple zone sprinkler system having a tank with an inlet, outlet and open top, the fertilizer distributor further having a rotatable dispensing tray with at least two compartments, wherein each of the compartments has an open bottom, the fertilizer distributor also having a bottom plate fixedly installed in the tank, wherein the bottom plate is conformed to the size and shape of the dispensing tray, and the bottom plate has an opening formed to conform with the size and shape of a dispenser tray compartment, wherein the dispensing tray is secured to the open top, in combination with means for turning the tray, and means for controlling the turning means to

coordinate the rotation of the dispensing tray with the operation of the plurality of zone valves is not known or suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
